

**TO: Fourth Year Medical Students**

**FROM: Orthopaedic Education Office**

**RE: Case Presentation Form**

As a fourth year medical student rotating through the Department of Orthopaedic Surgery at Washington University, you are expected to do one complete case presentation (patient workup with Dx and treatment/follow up plan as well as background research and reading) on one patient that you have seen during your weeks on a given service.

As documentation of this case presentation, a Case Presentation Evaluation form will be completed by either your faculty attending or your resident mentor and returned to the Orthopaedic Education Office.

During the first week of your rotation, please discuss with your faculty course master whether he/she or the resident mentor will be the audience and evaluator for this presentation.
